

# Hydrocarbon passive fire protection

## Protect your people and assets:

Fires in oil & gas facilities can be disastrous. Lives can be lost and damage to assets and equipment can run into millions of dollars. That's why oil & gas companies increasingly choose hydrocarbon passive fire protection coatings as a standard part of hydrocarbon fire hazard management.

In the event of a hydrocarbon pool fire, structural steel and supports are exposed to a rapid increase in temperature, which can quickly lead to structural failure – with serious consequences. Intumescent coatings insulates steel from these high temperatures during a fire, buying valuable time to save lives and assets.

## Protective Services

Protecting your assets has never mattered more.

In an increasingly competitive world, it's more important than ever to maximise the effectiveness and durability of every coating. With our Protective Services, you ensure your coatings are applied correctly, efficiently and according to specification. This ensures you enjoy extended asset uptime and optimised maintenance intervals – allowing your business operations to continue with minimum interruption.

## Greater efficiency. Higher profits.

We know that downtime and repair costs can impact your profits. So, we work with the professional application teams to ensure your coating projects are done right, with minimum costs, waste and downtime.

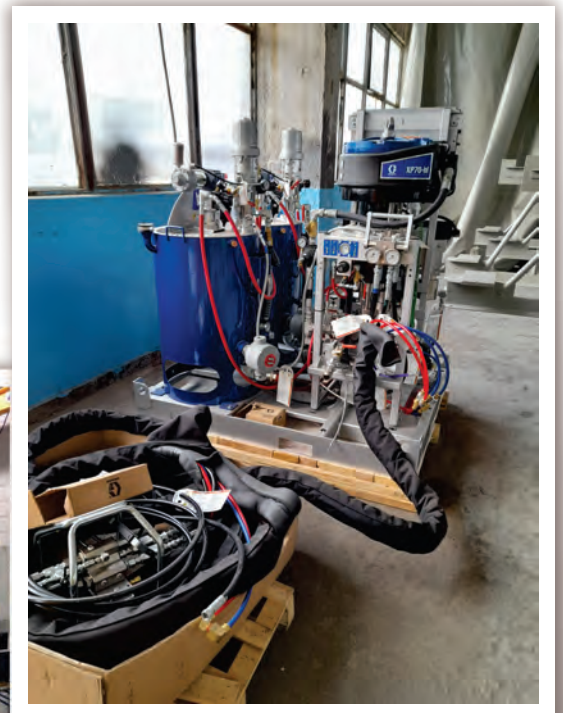

# Hydrocarbon passive fire protection

ABC Best Painting – your trusted partner:

When you choose hydrocarbon passive fire protection, you need a solution you can trust. At ABC Best Painting, we use our extensive expertise in PFP and oil & gas coatings to ensure you get the ideal solution for your plant – a high-performance system that will last for many years and will deliver reliable fire protection if you need it.

Either you choose a cement base plaster for cost efficiency or a lightweight coating with low dry film thicknesses to reduce the structure weight, ABC Best Painting delivers all certified hydrocarbon passive fire protection solutions.

- More than 21 years in passive fire protection
- Proven experience in oil & gas
- Full range of products certified to local and international standards
- Expert support in key oil & gas locations
- Consistent high quality and global delivery

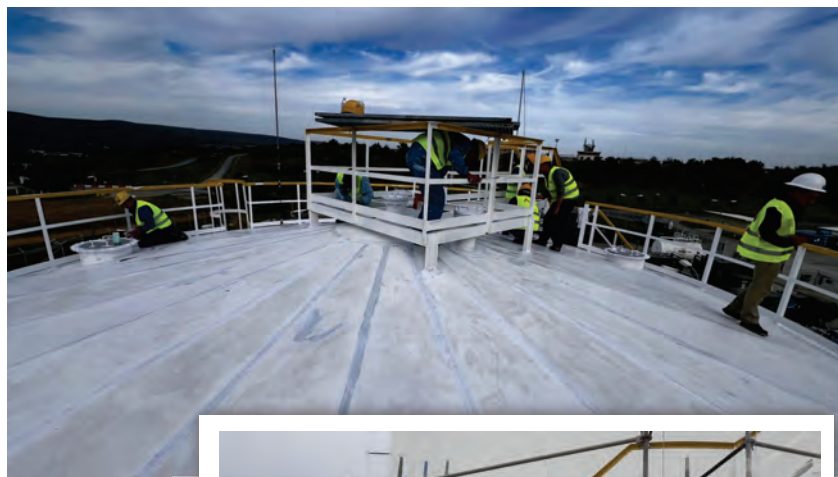

# Anti-corrosion protections

ABC Best Painting is a full scale, Romania-based, professional industrial coatings contractor with the experience and well trained professional staff to perform all coatings project under stringent guidelines, assuring the customer a superior quality product that is completed on time and under budget. Whether it is abrasive blasting, tank linings, maintenance painting, plant shutdowns or flooring projects we have the resources to handle all your coating needs.

Before the onsite work begins we listen to your needs and requirements to plan accordingly and make recommendations based on a number of factors including use, longevity, and cost.

ABC Best Painting can help you protect and extend the life of your equipment and structures. Our experience and expertise can make the process as non disruptive as possible. Our professional highly trained team together with our NACE and FROSIO coating inspectors delivers top quality results for maximum longevity and can coordinate necessary work with your production schedule.

Take advantage of our 20+ years of experience, from shale to offshore drilling platforms to pipelines and tank farms, we've got you covered.
